## Summary

A flexible and experienced IT professional with a passion for infrastructure and development roles. With hands-on experience in technical support, network infrastructure, and system troubleshooting, I excel in the effective resolution of technical issues to foster seamless operations and user satisfaction. I possess strong interpersonal and task prioritization skills, enabling me to thrive both in collaborative team settings and while working independently. This practical experience is built upon a solid foundation from a Bachelor's degree in Informatics Engineering and is validated by industry certifications such as the Dicoding, AWS, and Google. As a fast learner, I am eager to apply my skills and quickly master new technologies required for the role.
